

**TOPICS**

- Artificial intelligence and expert systems
- Automation
- Automotive equipment and electrical traction
- Bio-, Nano- materials & technologies applied in electrical engineering
- Electrical apparatus
- Electrical energy transport and distribution
- Electrical energy utilizations
- Electrical machines and drives
- Electromagnetic field
- Electro-ecology
- Electronics and mechatronics
- Industrial information technology
- Linear and nonlinear circuits
- Metrology and measurement systems
- Quality, reliability and maintenance
- Robotics in industry and medicine
- Thermal and electrical power generation
